Home Schooling Classroom Set-up and Tips

Setting up your homeschool space

Setting up your homeschool space

Keep an Open Mind

- This area does not need to look like a classroom

Find the Right Work Surface

- Dedicate a table or desk where work can be laid out and left uninterrupted

Prioritize Comfort

- Make sure you have a comfortable chair you can sit in for periods of time

Set up Your Supplies & Materials Nearby

A photograph of a desk with a globe, books, and a window. The desk is white and has a small globe on it. There are several books on a shelf to the left. A window is visible in the background, showing greenery outside. The image is partially obscured by a white circular graphic on the right side of the slide.

Setting up your homeschool space

Consider Aesthetics

- Create an art or academic wall to keep creations
- A cork board is a good idea for the gallery

Make Clean-up Simple

- Keep the homeschooling work area clutter free
- Keep a trash can and recycling bin nearby

Go Outside!

- Don't forget to use the outdoors as learning spaces, especially on nice days

Consult Your Student

- Ask your child(ren) who will be using the space what they would find to be the most helpful
- Reassess your space periodically and make the changes needed

Tips & Tricks for Homeschooling

Map out the school year ahead of time

- Get a copy of your school district's academic calendar
- Work together to set learning goals by month

Set learning goals together

- Outline some learning objectives for your child ahead of time
- Track progress on your goals and plan out big projects

Follow a daily schedule

Establishing a predicable routine can provide a sense of normalcy

- If you are teaching more than one child – use a swim lane diagram to track multiple daily schedules
- Color code by type of activity or school subject
- Pick a system that works for you and your schedule – but keep a routine

A young girl with curly hair, wearing a yellow shirt and blue jeans, is sitting on a wooden bench and playing chess with a man. The man is wearing a blue long-sleeved shirt and is looking down at the chessboard. The chessboard is on a wooden table, and the pieces are wooden. The background is a blurred outdoor setting with green foliage.

Take learning beyond the classroom

Play board games

Practice baking and cooking

Write emails to friends and family

Visit local businesses

Go to the farmer's market

Go to the library

Make learning a family activity

Look for learning outside of the textbooks

- Read together
- Explore a new hobby
- Have a family member teach a skill
- Make crafts
- Be a tourist in your own town
- Take a family hike
- Take a trip to the zoo

Collaborate with other homeschoolers

There are many homeschool communities all around

- Connect online with groups and dedicated learning websites for access to shared resources
- Research your local school district parent network

Ease into school

Prepare for a period of transition

Consider starting with just one or two subjects the first week then adding more each week

Don't be afraid to experiment with your learning style and schedule

Virtual Learning for Children

Online Learning Websites

- **Khan Academy – [khanacademy.org](https://www.khanacademy.org)**

article on how to help children cope with the changes

Keep Health Advocate Top-of-Mind

Special Needs Children

- Locate and directly communicate with qualified doctors for second opinions
- Research in-home care and school- and community-based services
- Identify leading treatment centers
- Research conditions, latest treatment options, medication side effects and generic equivalents
- Explain Medicaid and other benefits issues
- Untangle medical bills; uncover errors

Our Team is ready to help

- Review current CDC, state and local health department guidelines
- Discuss symptoms, provide testing information; guide to healthcare provider as needed
- Provide guidance around preventive measures and exposure avoidance
- Help stay on schedule with routine immunizations, yearly flu shots and well-child visits
- Review employer benefits coverage
- Locate behavioral health specialists for emotional or adjustment issues, etc.

And much more!
