General Description

LaGuardia Community College is seeking instructors to teach a community health worker training course. A flexible schedule may be required to include day, evening and/or weekend hours.

Topics to be covered in the instructor training and course curriculum include:

- Key concepts in public health
- Individual and community outreach
- Organization, time management and documentation
- Individual and community assessment
- Advocacy and community capacity building
- Care coordination and systems navigation
- Navigating health insurance
- Education to promote healthy behavior change
- Topic specific information on screening and care of common chronic diseases
- Introduction of digital literacy to work within the healthcare field, teach the foundational and essential basic software skills

CHW Training Program consists of four courses:

Foundations for Community Health Workers (96 hours): This course is designed to provide an overview of the roles and responsibilities of a CHW and covers the CHW core competencies recommended by National Community Health Worker Advisor Study. This course is practical and skill-based focusing on the essential aspects of Community Health Worker functions.

Health and Wellness (32 hours): Emphasis will be on learning strategies that can be used to aid in client awareness, their education, and incorporation of health into their daily living.

Public/Community Health (48 hours): This course provides a theoretical and practical overview of public health with a strong emphasis in social justice and the role of policy in health outcomes. It covers a basic

orientation to the organization of health care systems in New York City and the position of the community health worker within these systems.

Technology for Community Health (32 hours): The objective of the digital literacy course is to provide students with some of the foundational, and essential basic software skills, while providing them with hands-on experience throughout the course. Students will also be exposed to using various health app devices to help them thrive as citizens and community health care professionals.
