

Job Title	Lab Manager
PVN ID	RC-1806-002532
Category	Research
Location	CUNY-ADVANCED SCIENCE RESEARCH CENTER
Department	Structural Biology/Biophysics/Biochemist
Status	Full Time
Salary	Depends on qualifications
Hour(s) a Week	35
Closing Date	Aug 31, 2018 (Or Until Filled)

General Description

The Elbaum-Garfinkle lab at the Advanced Science Research Center (ASRC) at the Graduate Center, CUNY, currently has an immediate opening for a highly organized Lab Manager/Research Associate.

The Elbaum-Garfinkle lab is an interdisciplinary team of scientists studying disordered proteins at the nexus of liquid phase separation and pathological aggregation. Using single-molecule fluorescence tools, material science methodology, and *C. elegans* genetics, our group probes the mechanism and regulation of protein self-assembly on the molecular, material and organismal levels.

Qualifications: Exceptional organizational skills, attention to detail, and post-graduate experience in a molecular biology wet lab is required. Experience with proteins, protein purification, microscopy and/or *C. elegans* are strongly preferred.

Duties: Will manage and supervise students in basic molecular biology/protein handling techniques in the lab; assist in general lab management, including managing lab stocks and supplies, lab ordering, lab safety, and streamlining lab protocols. Opportunities to contribute to the growth of an exciting new research lab in fast paced research environment.

Other Duties

Qualifications

Applicants should upload a CV and Cover Letter briefly summarizing previous expertise and current/future interests
