

<b>Job Title</b>	Senior Lab Technician
<b>PVN ID</b>	RC-1905-003099
<b>Category</b>	Research
<b>Location</b>	CUNY-ADVANCED SCIENCE RESEARCH CENTER
<b>Department</b>	Neuroscience
<b>Status</b>	Full Time
<b>Salary</b>	Depends on qualifications
<b>Hour(s) a Week</b>	35
<b>Closing Date</b>	Jun 05, 2019 (Or Until Filled)

## General Description

---

The City University of New York's newest facility, the Advanced Science Research Center (ASRC), boasts the success of the University's rich past, in building a Center of Excellence for scientific research. With a focus in the fields of Nanoscience, Photonics, Structural Biology, Neuroscience, and Environmental Sciences, the ASRC operates as a center of development of an integrated research network that brings together faculty, students, and post-doctoral fellows to perform cutting-edge science. The goal is to educate trainees in becoming the new leaders of tomorrow, by providing growth in increasingly inter-related disciplines of applied science.

Applications are invited for a Senior Lab Technician position to join the Neuroscience Initiative. Reporting to the Director of Epigenetics Core Facility, the Senior Lab Technician will actively participate in laboratory's important research. The primary duties will involve assisting the core director for daily operation in the epigenetics core facility.

Key responsibilities include, but are not limited to:

- Assists with the epigenetics core facility daily operation and ensures that the equipment is in optimal and proper working condition. Assists with preventative maintenance and repairs as needed.
- Performs routine molecular biology laboratory procedures, such as qPCR, DNA electrophoresis, DNA and RNA preparation and Sequencing library preparation. Skills in flow cytometry or genome-wide sequencing are preferred.
- Assists in maintaining inventory of supplies, equipment and/or reagents. Assist with ordering supplies/equipment/reagents as authorized or ensure that needs are escalated appropriately.
- Receives supply orders and confirms accuracy of delivery.
- Collects, analyzes, and assures validity of data independently and reports to direct supervisor.
- Adheres to standards for safety and hygiene and ethical conduct as defined by the University and relevant outside parties.

## Other Duties

---

- Performs related duties as assigned.

## Qualifications

---

The ideal candidate will possess the following knowledge, skills and professional competencies:

- A B.S with minimum 4 years of experience or M.S. degree with minimum 2 years of experience in specific research areas (e.g., molecular biology, biochemistry) is essential. Additional experience with extensive bench lab work is preferred. Background in neuroscience is a plus.
- Candidate must have significant experience in molecular biology. Experience with chromatin immunoprecipitation, epigenetics, or genome wide sequencing is a plus.
- Flexibility in work schedule to accommodate experimental need that may occur on any day of the week.
- In-depth knowledge of the scientific principles, methods and processes (technical and/or theoretical) used

to conduct scientific research-- including experimental design, methods of data collection and analysis, and interpreting and reporting results

- Demonstrated expertise at working across and within disciplines.
- A proven team player, able to collaborate and motivate successfully.
- Ability to plan workload effectively.
- Excellent interpersonal skills.
- Confident and competent experimentalist.

Excellent verbal and written communication skills and the ability to work well independently or as part of a team

Applicants should upload a CV and Cover Letter briefly summarizing previous expertise and current/future interests
