

Defense Advanced Research Projects Agency: Biological Technologies Office

Dr. Kristen Jordan
Deputy Director

NYC Defense & Intelligence Forum
6 May, 2022

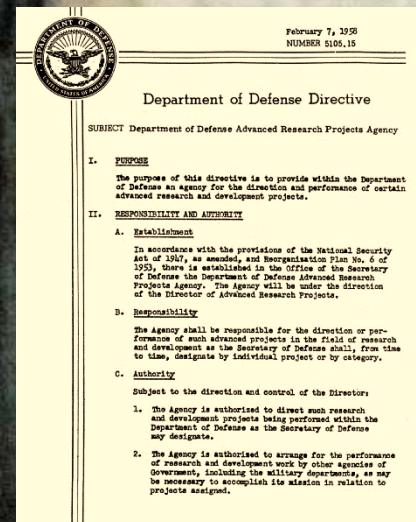

Origins

October 4, 1957

U.S.S.R. beats U.S. to space with Sputnik satellite; U.S. should never again be surprised by technology.

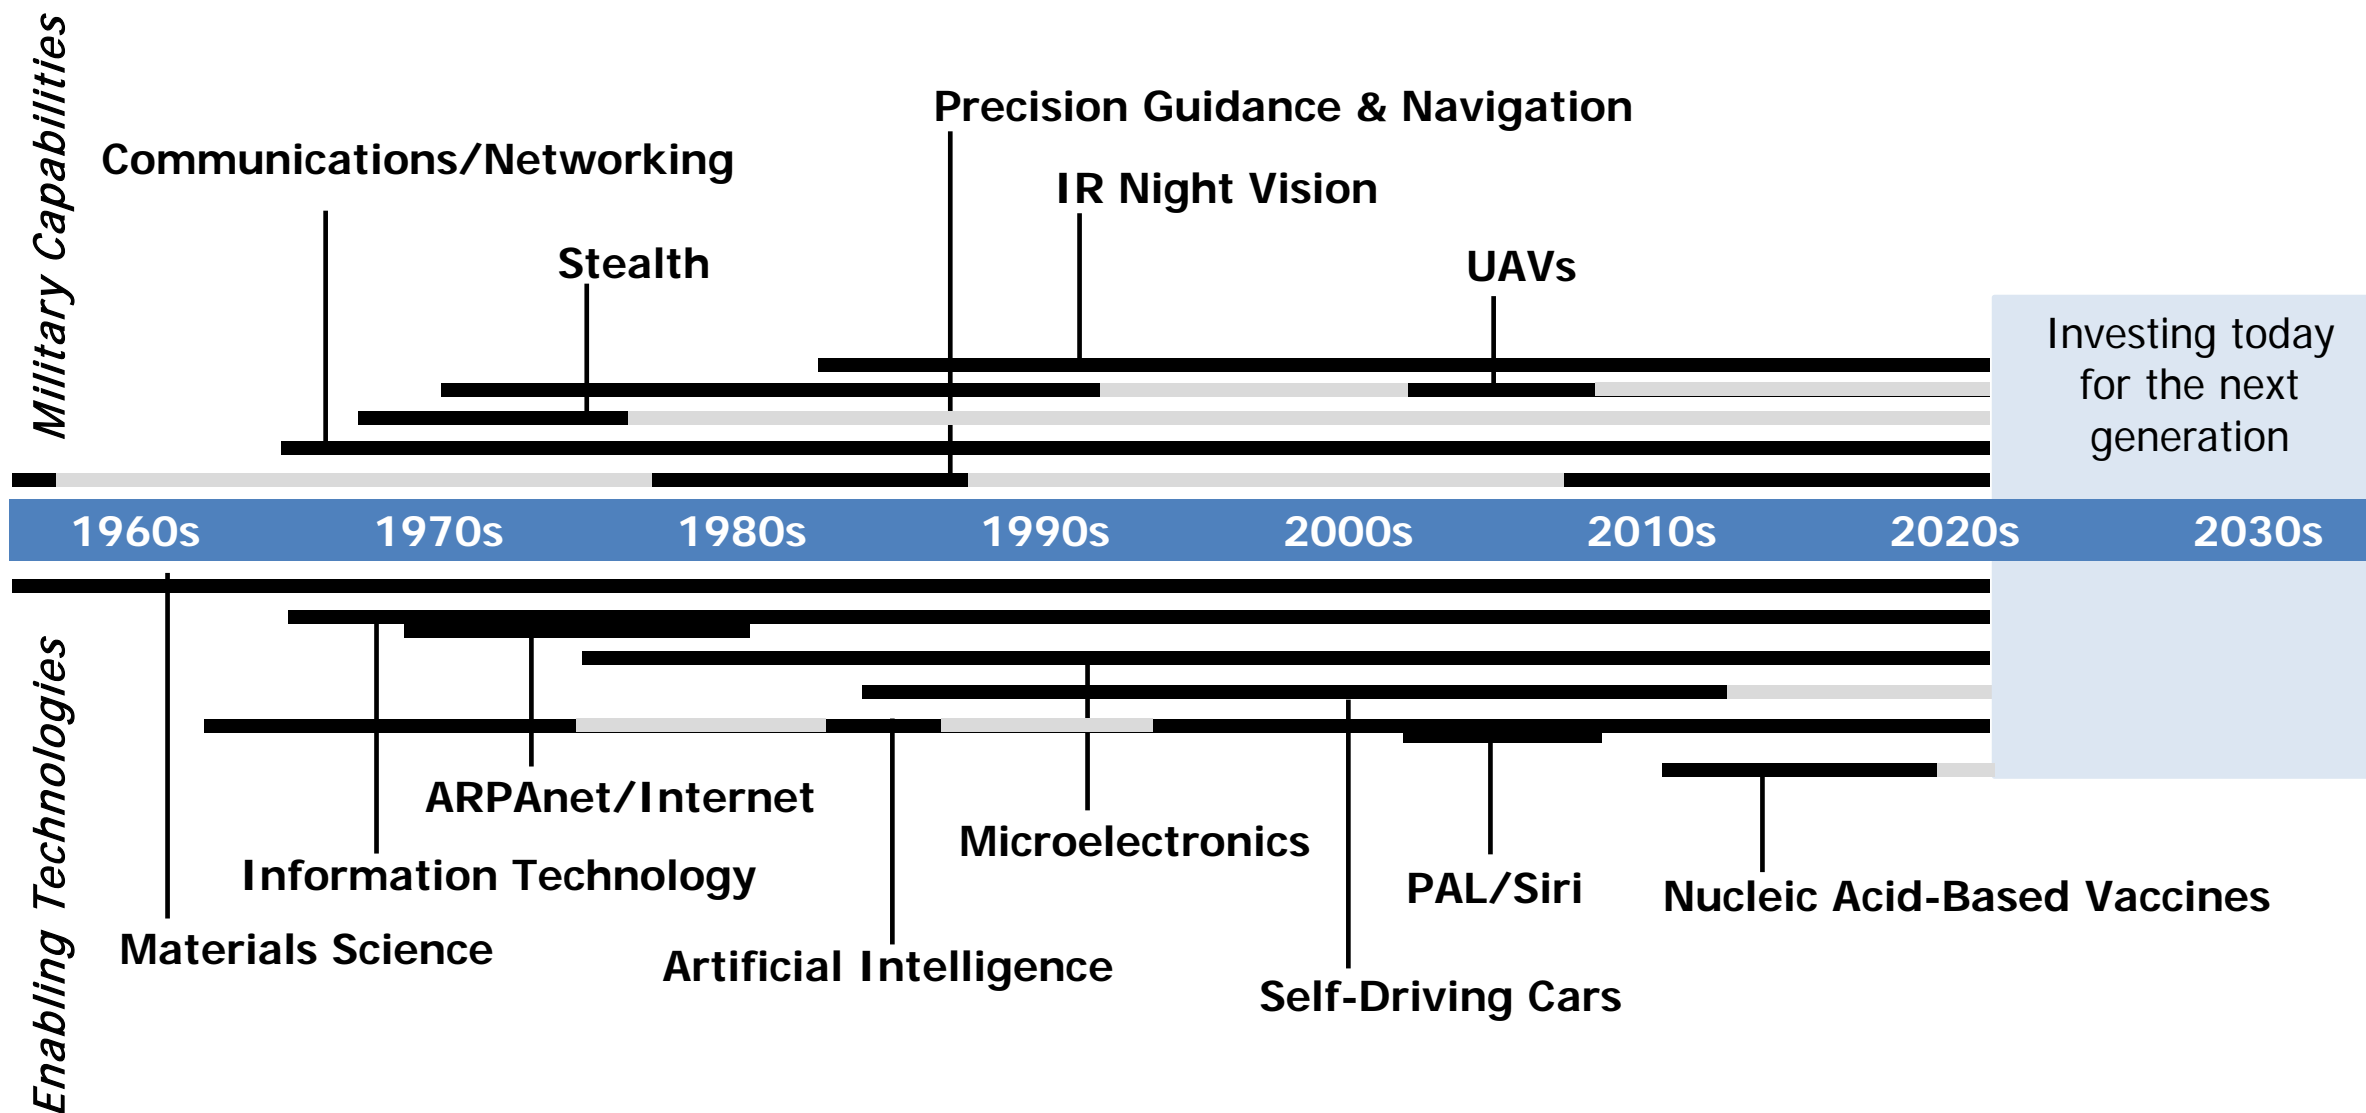

February 7, 1958

"The purpose of this directive is to provide within the Department of Defense an agency for the direction and performance of certain advanced research and development projects."

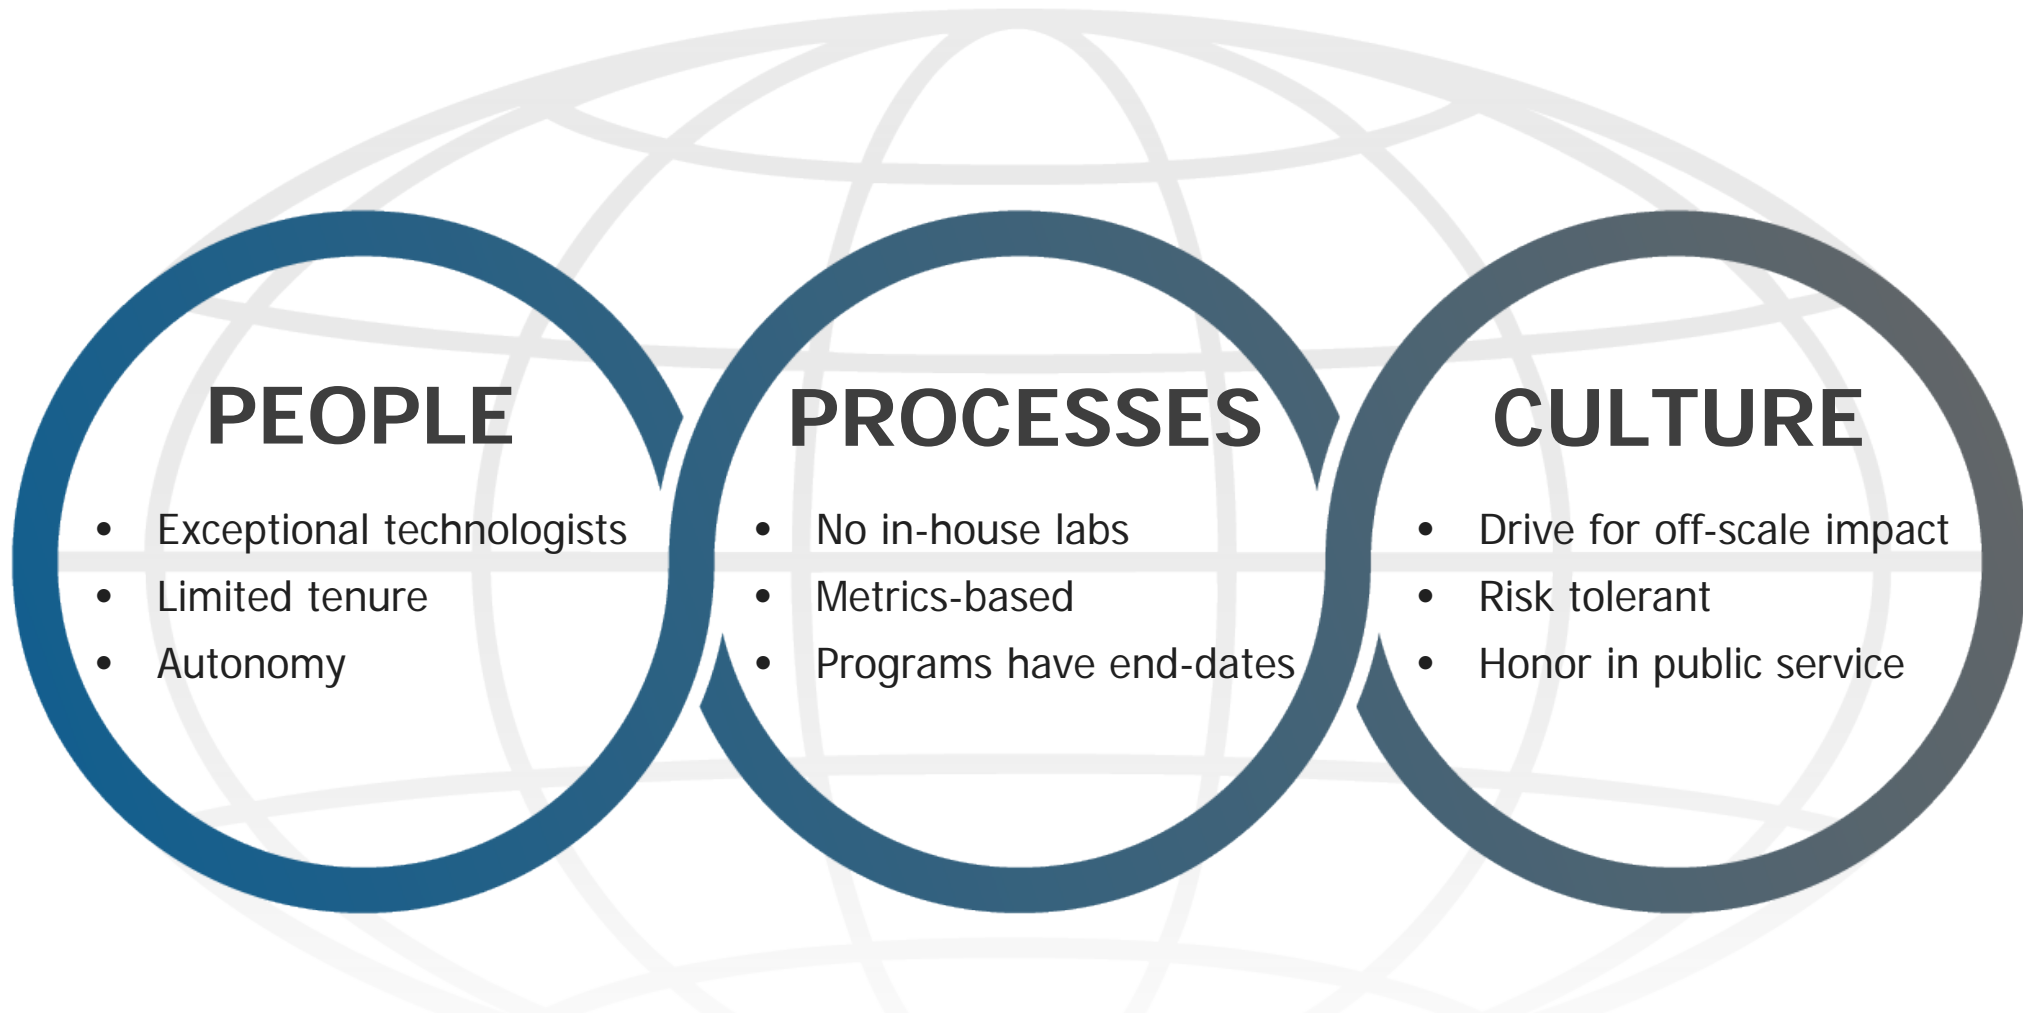

Pivotal early investments that change what's possible

Breakthrough technologies and capabilities for national security

DARPA's culture persists and the agency delivers

Role in S&T ecosystem

- Create breakthrough, paradigm-shifting solutions.
- Accept and manage significant technology risk.
- Disrupt or massively accelerate technology roadmaps.

DARPA Technical Offices

The Heilmeier Catechism

1. What are we trying to do?
2. How is it done today and who does it? What are the limitations of the present approaches?
3. What is new about our approach, and why do we think we can be successful at this time?
4. If we succeed, what difference do we think it will make?
5. How long do we think it will take, and what are our mid-term and final exams? How much will it cost?

George Heilmeier
DARPA Director 1975-1977

PREVENT AND IMPOSE TECHNOLOGICAL SURPRISE

Create New Options for National Security Leaders

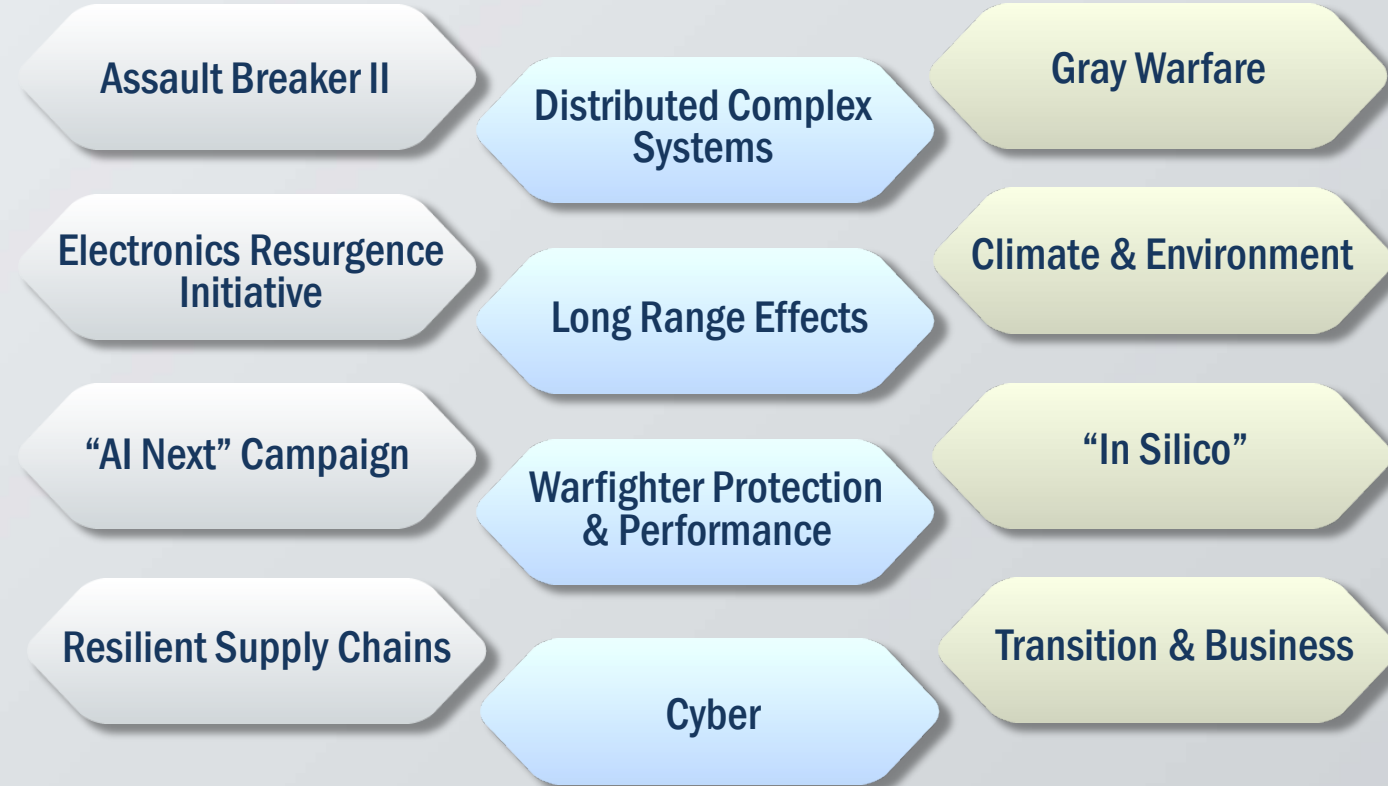

For All Domains

Space • Air • Land • Sea • Subsurface
Virtual • Electromagnetic • Social

Example Portfolios

Foundations for Technological Surprise

Biotechnology • Complexity • Chemistry • Data Science
Human-Machine Symbiosis • Interoperability • Machine Learning
Materials • Microelectronics • Quantum • Social Science ...

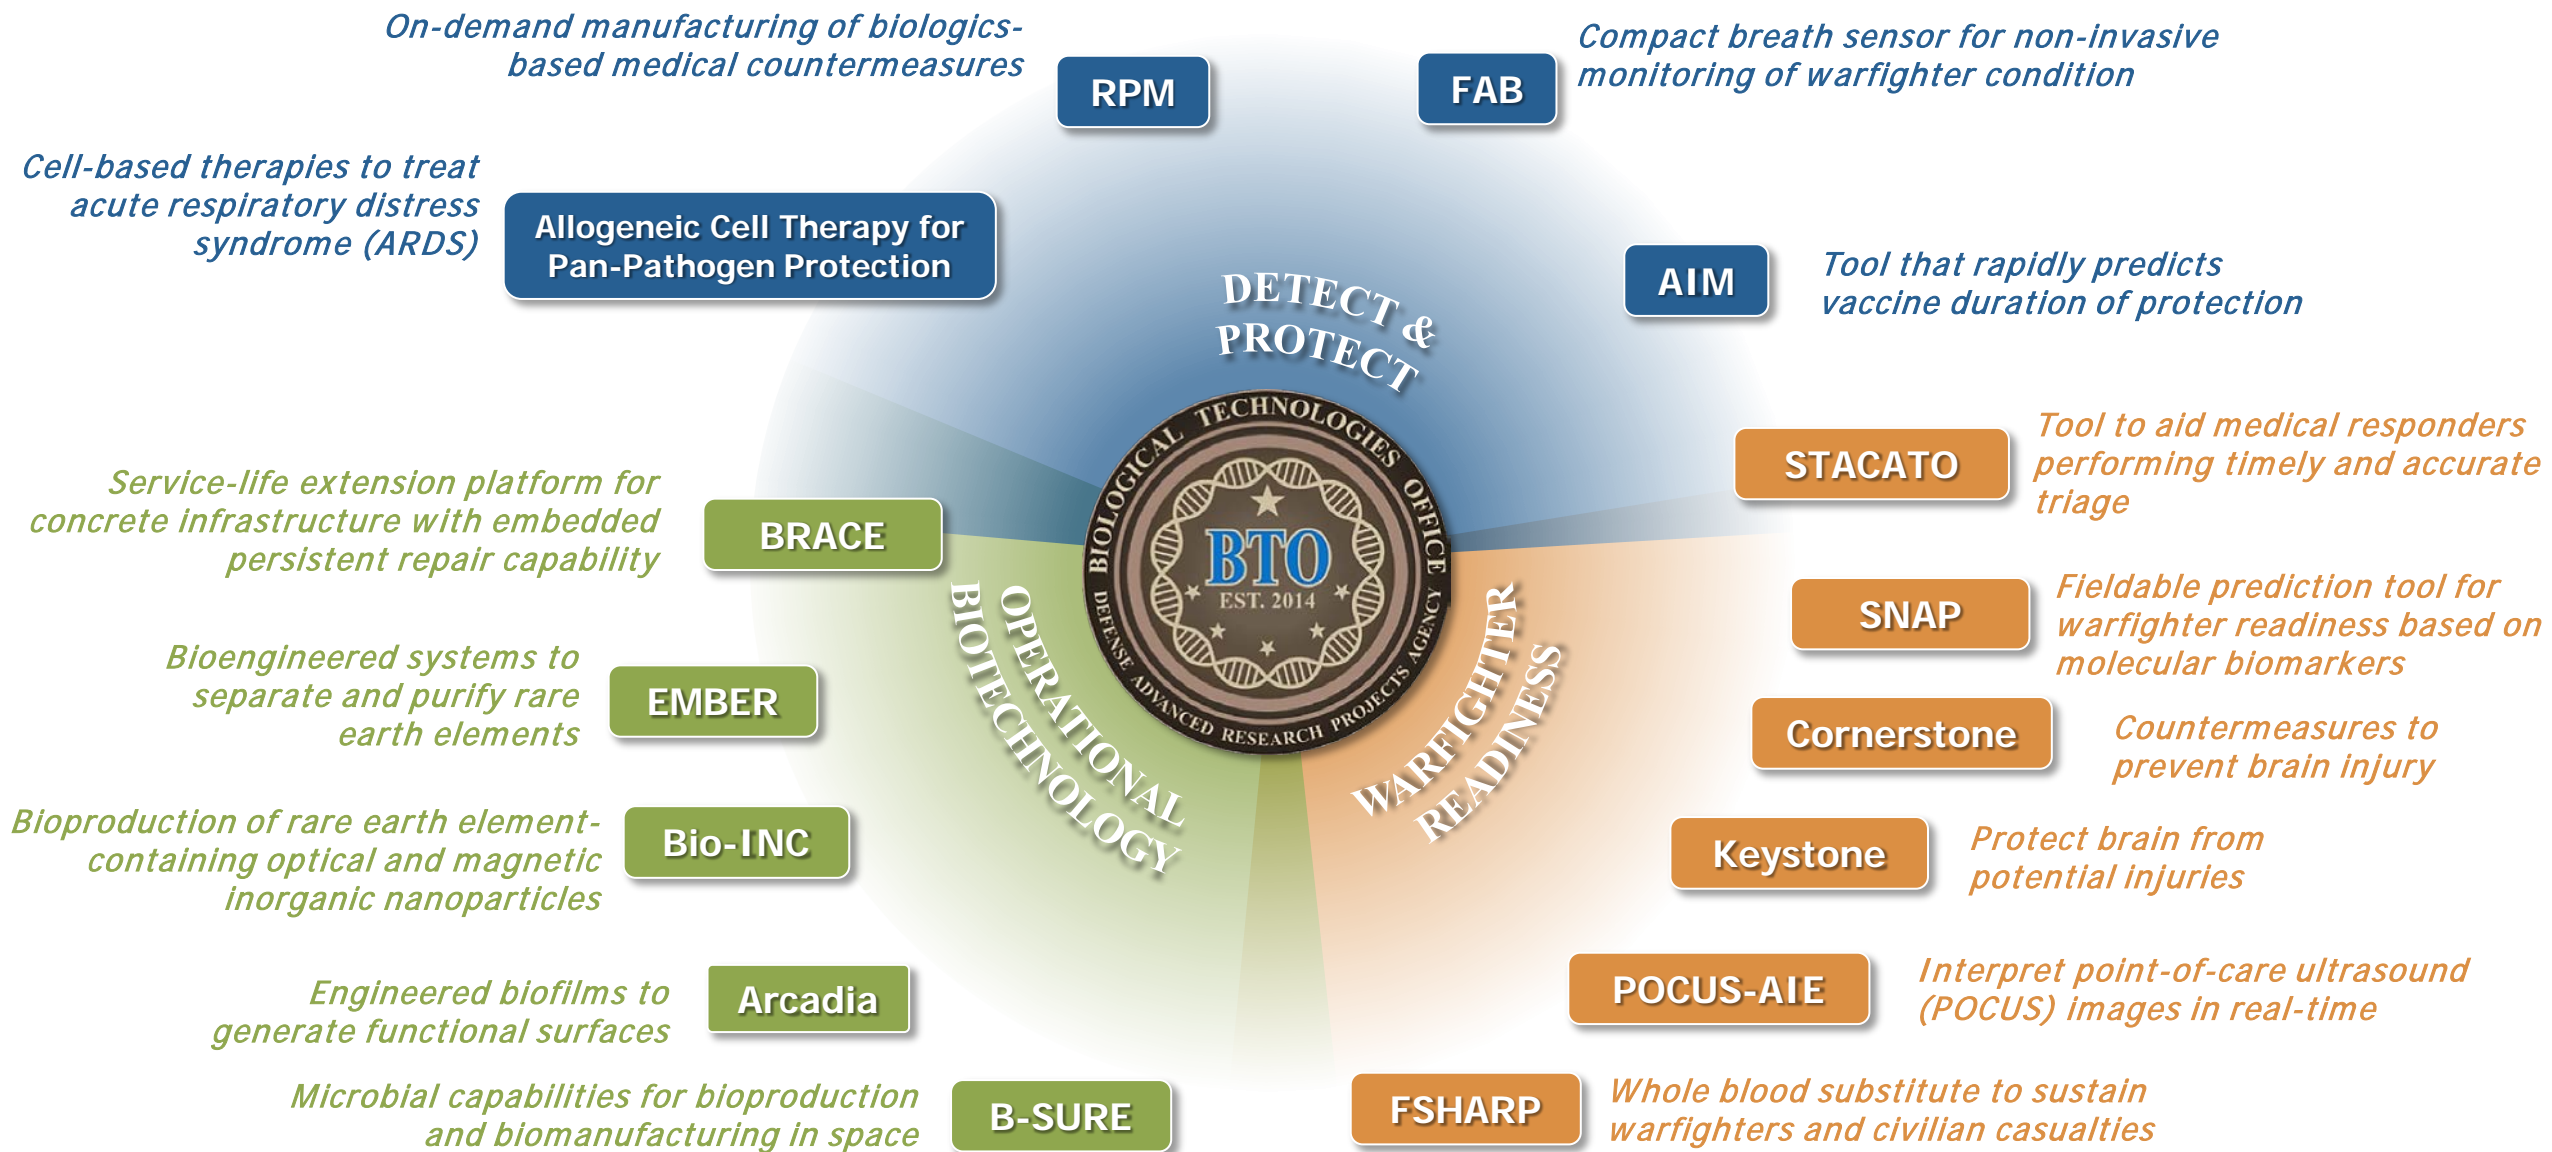

Harnessing Biology to Support the Warfighter

BTO develops capabilities that embrace the unique properties of biology—adaptation, resiliency, complexity—to revolutionize how the United States defends the homeland and prepares and protects its Warfighters

2021-2022 BTO New Starts

BTO Drives Ethical, Legal, and Social Issue (ELSI) Engagement to Ensure Responsible Technology Development

Goal: Flexible ELSI framework to accommodate changing technical & policy landscape

Setting a Safe Course for Gene Editing Research

Safe Genes program aims to build a biosafety and biosecurity toolkit to reduce potential risks and encourage innovation in the field of genome editing

Ways to engage with DARPA

Opportunity	Audience	Topic Specificity	Timing	Duration
Program Specific Broad Agency Announcement (BAA)	General Research	Narrow	Irregular	Up to 5 years (Multiple phases)
Office-wide BAA	General Research	Broad	Rolling	~1 year
Small Business SBIR/STTR	Small Business	Narrow	Rolling	Up to 3+ years (Multiple phases)
Young Faculty Award	Tenure Track Assistant/Associate Professors	Narrow	Annual	Up to 2+ years
Transition Partner	Gov't/Commercial	Narrow	Program Dependent	Partner Dependent
Program Manager	Academia/Gov't/ Industry	Narrow	Rolling	2-4 years

Visit darpa.mil for more information

Young Faculty Award (YFA)

Identify and engage **rising stars** in junior research positions, emphasizing those without prior DARPA funding, and expose them to DoD needs and DARPA's program development process

The YFA program provides:

- Research funding
- DoD contacts
- Military visits/exercises
- PM Mentor

The YFA program yields:

- Insight into DoD problems
- Novel ideas
- Career development
- Future DARPA performers

Develop the next generation of academic scientists, engineers, and mathematicians who will focus a significant portion of their career on DoD and National Security issues
